

Bringing You Conditioned Water and Clean Air Watertech, Inc. and Gunter Heating and Air Conditioning

Milestone Custom Homes teams up to bring a cleaner environment inside your home with Innovative and Earth Friendly technologies.

School has started, football season is underway and the Inspiration Home has entered another phase of construction. With much of the structure in place, Milestone Custom Homes has turned its attention to those necessities of living most of us don't think about. Air and water. Milestone has chosen partners whose innovations in their fields provide cleaner air and water as well as more effective delivery systems which means less impact on pipes, ducts and appliances.

PRODUCT SHOWCASE:

In keeping with its philosophy, the Inspiration Home is still moving beyond typical green building practices to integrate processes, materials and technology for better quality, more sustainable living. "We wanted each

component of this home to compliment another and perform more than one function," says Jerry Fay of Milestone Custom Homes. "Watertech, Inc. and Tempstar products provide cleaner water and air through state of the art filtration systems, and ultimately will save the homeowner money in maintenance costs."

Located in Mauldin, SC, **Watertech, Inc.** has been serving the South Carolina, North Carolina and Georgia markets for over 20 years. With expertise in both well and municipal water treatment, **Watertech** provides solutions for cleaner, better tasting water. Additionally, **Watertech** provides

filtration systems to reduce mineral deposits and water acidity which shorten the life span of plumbing, water heaters and other appliances.

The Inspiration Home will feature two of **Watertech's** innovative products. **Watertech's** Watts Reverse Osmosis Systems with Kwik-Change cartridges provide quality drinking water with very low maintenance. Its whole house carbon filtration system removes chlorine, tastes and odors, as well as Volatile Organic Contaminates (VOCs) caused by chlorination.

Milestone Custom Homes and **Gunter Heating and Air Conditioning** have also installed **Tempstar** Heating and Cooling

Product's Smart Comfort TXT and Smart Comfort two-stage gas furnace. The two products work together to provide maximum durability and energy efficiency. But it was an impressive list of features that made **Tempstar** a perfect match for the Inspiration Home — including a humidifier to reduce dryness, air filters to eliminate indoor pollutants, UV lights which help prevent the growth of microbes as well as a number of options and settings to help homeowners save energy and money.

The Inspiration Home is located in Cobblestone, a subdivision in Simpsonville, SC. Community Journals will continue to track its evolution both here and online, providing information on the hottest home building trends in the industry. More information is also available at the official website of The Inspiration Home. www.inspirationhomesc.com.
